Fall 1: Mixed Media

We will dive into various mediums such as clay, paint, found objects, handmade paper, natural items, etc. Students are highly encouraged to express their individual creativity and incorporate various mediums into their work. This is a wonderful chance for your child to be exposed to new mediums and/or have an opportunity to further expand an interest in a certain medium.

Fall 2: Science and Math Meet Art

Ditch the iPad and explore the outdoors to gain inspiration and knowledge of the natural world. Students will create nature art using items they find. We will also create art through scientific experiments and the application of engineering properties. Come join the fun as math and science collide with art!

* This camp may include a field trip - an instructor-led walk to Hampton Park to collect natural items!

Fall 3: Modeling the Masters

Students will explore the works of several famous artists and learn to replicate their signature style. We will discuss the formal elements of art and learn how to carefully examine pieces of art for deeper appreciation. This is a great opportunity for your child to expand his/her vocabulary as well as his/her knowledge of history and geography.

Fall 4: Weaving & Embroidery

Over the course of these four weeks, students will learn the basics of weaving and simple embroidery. Students will be able to create their own customized weaving to take home at the end. Children of all ages enjoy this calming activity that helps improve focus, patience and fine motor skills.
